Division/Department:	Metropolitan Transportation Services

Proposed Action/Motion

That the Metropolitan Council concur with the Transportation Advisory Board (TAB) action to adopt an amendment to the 2007-2010 Transportation Improvement Program (TIP) to reduce the funding amounts for selected SP #CM12-03, SP #90-595-10, and SP #CM-05-04 and to change the project description to reflect the change in project scope.

Overview and Funding

These three projects selected for funding from the regional solicitation have had scope changes that need to be reflected in the 2007-2010 Transportation Improvement Program (TIPP) so these funds may be spent. The projects will provide added transit service in the I-94 Corridor by adding park-and-ride spaces to be served with the new low sulfur, bio-diesel, articulated buses.

The revised projects are exempt from project and regional level air quality conformity analysis and are consistent with the Metropolitan Council Transportation Policy Plan, adopted on December 14, 2005, with FHWA/FTA conformity determination established on February 1, 2005.
